

What is a

# Geothermal

Comfort System?

Unlike ordinary heat pump systems, Geothermal Systems use the free and renewable ground temperature instead of outside air to provide heating, cooling and hot water. A Geothermal System taps into this free energy with an earth loop. Geothermal Systems are efficient, environmentally-sensitive & economical while providing exceptional comfort to your home or office.

Energy and cost savings of Geothermal heat pumps will vary by region and type of conventional system they're compared with. But the energy costs of Geothermal versus conventional HVAC systems will always be lower—and the Geothermal system will always be greener.

Geothermal cost savings can be increased with Geothermal energy incentives, available from federal, state, local, and utility sources.

### Additional applications offered by DeltaTemp

- Radiant floor heating systems
- Pool heaters
- Snow & ice melt systems
- Dynamic™ air filters
- Steam humidifiers
- Service & parts
- Preventive Maintenance Agreements

☑ DeltaTemp offers Turn-Key installation of all system components including units, loops, duct and controls.

☑ DeltaTemp is a WaterFurnace GeoPro Master Dealer evaluated on:  
Performance      Business practices  
Experience      Technical training  
Dedication      Installation quality

☑ DeltaTemp has proven performance. We have installed over 200 Geothermal systems over the past 17 years with continued satisfaction from our clients.

☑ DeltaTemp has over 30 years of experience in the industry.

☑ DeltaTemp is a fully insured Virginia State licensed contractor.

☑ DeltaTemp is has been a member of the Better Business Bureau since 1995.

*DeltaTemp is a proud dealer of*

**Benefits of**

# Geothermal

**Comfort Systems**

**Energy Savings up to 70%**

Even compared to high efficiency gas & A.C.

**Eco-Friendly**

Recognized by EPA & Dept. of Energy

**Safe**

No combustion, flames or fumes  
or chance of carbon monoxide poisoning

**Quiet & reliable**

Low maintenance, long life, super quiet operation

**No Outdoor Unit**

*Improved aesthetics, less wear and tear*

**Positive cash flow**

Monthly energy savings may be  
greater than the added cost

**Increases resale value**

Energy efficiency is a selling advantage

**DELTA TEMP**<sup>TM</sup>  
*Warmer, Cooler, Leaner... Greener.*

**Premier Providers of  
Geothermal Heating & Cooling**
