

**Your Family  
Deserves Clean,  
Healthy Air**

The key to cleaner and healthier air for your

family is simple – the Dynamic Air Cleaner™ filtration system. It's the **new generation**

**of air cleaning** technology, removing dangerous and harmful airborne particles that other air cleaning systems miss, including odors, smoke, bacteria, allergens, fine dust, molds and pollens. **No other air cleaner works as well** – or keeps the air in your home as clean – as the **Dynamic Air Cleaner**.

# The Smart Choice For Cleaner, Healthier Air, Dynamic Air Cleaner

## Improves Indoor Air Quality

According to the U.S. Environmental Protection Agency, "Indoor levels of air pollutants may be two to five times, and in some cases, more than 100 times higher than outdoor levels..." The patented technology used in the Dynamic Air Cleaner will provide your home with clean, healthy air. In fact, the Dynamic Air Cleaner is so effective it is used in thousands of hospital, commercial and institutional buildings around the world.

## Provides Unequaled Performance

The average cubic foot of indoor air contains 20 million particles. And more than 95% of these particles are smaller than 1 micron (a micron is 1/25,000th of an inch.) Most filters, including many so-called "high efficiency" filters, simply can't catch them. To effectively clean the air, the sub-micron particles must be removed. The Dynamic Air Cleaner provides unparalleled 97% capture efficiency of these particles down to 3 microns.

The superior efficiency of Dynamic Air Cleaner is a result of electronic polarization and activated carbon. The filter works by assigning polarity to all the particles in the air as well as the fiberglass media in the air cleaners. These particles are polarized, becoming like small magnets inside the air cleaner, where they will cling to each other and to the media in the air cleaner. And unlike typical electronic air cleaners, the environmentally friendly Dynamic Air Cleaner creates no ozone or nuisance noises.

## Easily Installed For Immediate Results

The Dynamic Air Cleaner easily can be installed in your new or existing system without costly ductwork re-configuration — cleaning the air in your entire home while saving hundreds of dollars over other systems. Your home will be cleaner, fresher and safer with less dust and fewer germs and odors. Allergy and asthma sufferers will experience immediate and dramatic breathing improvements.

The Dynamic Air Cleaner, the only choice for cleaner, healthier air. Your family deserves nothing less.

Particle Size	Typical Contaminant	Capture Efficiency	
		4-6" pleated	Dynamic Air Cleaner
3 to 10 microns	Pollen, mold, dust, hairray	98%	99%
1 to 3 microns	Auto emissions, lead dust, large bacteria	Not effective	98.6%
.3 to 1 microns	Smoke (tobacco, cooking), small bacteria, fine dust, paint pigments	Not effective	97%
	VOCs (odors, off-gases including formaldehyde from carpets, furniture and cleaning products)	Not effective	40%
